

SUFFOLK OFFSET have been working within the shipping, forwarding and haulage industry for over 35 years. We offer affordable design and print solutions for all sizes of business.

Digital Printing - The New Frontier

Although one of the first to embrace modern technology, Suffolk Offset is from the 'Old School' and we believe our customer care is second to none. We are a local company with a national reputation built over these past 35 years through our innovative design, excellent print quality, our friendly, efficient service and by meeting our clients requirements and deadlines. We are pleased to announce the arrival of a new Xerox 700 Digital Press to compliment our successful, well established lithographic printing presses. Our new digital service is being promoted under the name of Suffolk Digital, targeting shorter-run and on demand printing. Suffolk Digital were the first printers in Suffolk and only the second in East Anglia to take

delivery of this new press - a testament to the company's commitment to remaining at the cutting edge of new technology. The Xerox 700 offers outstanding image quality with the flexibility of in-line finishing allowing brochures to be printed, folded and stitched in a single run. Sales Director Brian Pearson welcomes the new press "which will offer our existing and new clients an alternative to traditional offset litho printing on smaller more bespoke printing jobs. The new press will help us capture a share of the explosive growth in digital colour printing"

As well as being able to offer the highest quality stationery and promotional printing the Digital Press utilising the latest Fiery Rip Server is able to process jobs with variable data allowing every sheet within a print-run to be personalised to target individual customers. For all digital printing enquiries please contact Stuart Wade on **01473 611222**.
